# Chapter 1 Configuring Port Mirroring Commands

## 1.1 Port Mirroring Configuration Commands

The following are port mirroring configuration commands:

- mirror
- show mirror

### 1.1.1 mirror

#### Description

```
[no] mirror session session_number {destination {interface interface-id} | source {interface interface-id [, | -] [both | rx | tx]}}
```

It is used to configure the command.

#### Parameters

Parameter	Description
<i>session_number</i>	Number of port mirroring, whose value is 1
<i>destination</i>	Information about the destination port mirroring
<i>source</i>	Information about the mirrored port
<i>both   rx   tx</i>	Data flow that will be mirrored  <i>rx</i> means that the input data is mirrored. <i>tx</i> means that the output data is mirrored. <b>both</b> means that input and output data are mirrored.

#### Instruction

The command is configured in global configuration mode.

#### Example

Port g0/2 functions as the output mirror of port g0/1.

```
Switch(config)# mirror session 1 destination interface g0/2
```

```
Switch(config)# mirror session 1 source interface g0/1 tx
```

### 1.1.2 show mirror

#### Description

```
show mirror [session session_number]
```

It is used to display the port mirroring information.

**Parameter**

Parameter	Description
